

## **Summary of RoomPerfect™ review on audioforum.be October 2006**

- RoomPerfect moves the musical and technical boundaries here and now, thus defining the future standard for quality.
- Lyngdorf dares to innovate, and even more, starts a digital revolution.
- No other company or brand offers a product like RoomPerfect for such an affordable price that is so technically advanced, and that lifts the quality of sound reproduction to such unknown heights.
- RoomPerfect is truly futuristic, affordable, practical and needs no external PC. In less than no time the setup is completed, leaving you with hours and hours of joy of the most realistic reproduction of the original recording... ever.
- Who wants to stop upgrading and trading-in of components and wants to start listening to real / true music, has to start with Lyngdorf.
- Hearing is buying.
- I think RoomPerfect is the best thing that has happened to the AV market in years... let the awards roll in!
